Profile

Computer Science graduate currently working as a Website Support & SEO Executive, with hands-on experience in website management, on-page SEO, and digital marketing analytics. Actively involved in managing and optimizing websites, improving performance and user experience, and handling technical support tasks. Experienced in using Google Analytics (GA4), Google Search Console, Meta Ads Manager, and Meta Business Suite to track website traffic, analyze user behavior, and enhance online visibility. Strong foundation in cybersecurity, Python, networking, and system security.

Professional Experience

Marketing & Web Support, *5ginfotech*

<https://www.5ginfotech.net/> 📄

Providing website support including regular updates, maintenance, and basic performance optimization. Assisting with digital marketing activities, social media handling, and on-page SEO improvements. Monitoring website functionality, fixing UI/UX issues, ensuring mobile responsiveness, and coordinating with teams to support business and client requirements.

02/2026 – Present

Rohtak, Haryana

Website Support Executive, *Mohan Ecom solutions*

Managed and maintained the company website with regular updates and performance enhancements. Implemented on-page SEO, monitored traffic and performance using Google Analytics (GA4), and handled indexing and technical issues through Google Search Console. Supported digital advertising activities using Meta Ads Manager and improved website speed, responsiveness, and overall user experience.

12/2025 – 02/2026

Remote (Work From Home)

Projects

Password Strength Checker,

<https://github.com/Bhaveshmalik27/password-strength-checker>

Built a tool in Python that checks the strength of user passwords based on length, uppercase/lowercase characters, digits, and special characters. It helps users avoid weak passwords and promotes better cybersecurity practices.

07/2025 – 07/2025

Threat Intelligence Platform,

<https://github.com/Bhaveshmalik27/Threat-Intelligence-Platform>

A Threat Intelligence Platform (TIP) is a cybersecurity tool that centralizes, analyzes, and disseminates threat data from various sources. It helps organizations identify, investigate, and respond to potential threats efficiently, enhancing their overall security posture.

03/2025 – 03/2025

Security scanner, <https://github.com/Bhaveshmalik27/Security-scanner> 02/2025 – 02/2025
Security scanners are tools designed to identify vulnerabilities in systems, networks, and applications. They automate the detection of security flaws, helping organizations to address potential threats and enhance their cybersecurity posture

Website for Tourism 09/2024 – 09/2024
Developed a tourism website that provides destination details, tour packages, and online booking with user and admin management features.
